

COLGATE'S TOOTHY MAGNET

This fun and easy project can be created at home by you and your child. It's great for older kids to do with younger siblings too! Use the finished magnet to hang artwork or homework on the refrigerator. It can also be used on a bathroom medicine-cabinet or any metal appliance or cupboard.

On the refrigerator door, the smiling tooth magnet will remind the whole family to choose healthy snacks. It shows that our teeth are important and are always with us – if we take care of them!

- Materials:**
- 1 cup flour (not self-rising)
 - 1/2 cup salt
 - 1/2 cup water
 - 3/4" diameter magnet
 - White paint: tempera, poster, model or water-based enamel
 - Marking pen
 - Craft glue

- 1 Mix flour and salt together and add water gradually until a soft dough forms.
- 2 With a rolling pin, roll dough to about 1/4" thick. Copy the pattern on this page to cut out tooth.
- 3 Place tooth shape on a foil-covered cookie sheet. Smooth and shape edges with your fingers.
- 4 Bake at 200° for 1 hour. Turn oven off and let tooth remain in oven overnight to dry.
- 5 Paint tooth and let dry. Draw a happy face on it with marking pen.
- 6 Glue magnet to the back of the finished tooth.
