**Advice to Doctor** Treat symptomatically.**Other Information** For advice, contact a Poisons Information Centre (Phone Australia 131 126; New Zealand 0800 764 766) or a doctor.

## 5. FIRE FIGHTING MEASURES

**Suitable Extinguishing Media** Foam, dry chemical powder, carbon dioxide, water spray or water fog.**Hazards from Combustion Products** Under fire conditions this product may emit toxic and/or irritating fumes including carbon monoxide, carbon dioxide, oxides of phosphorus and oxides of sulphur.**Specific Hazards** Combustible solid; will decompose and/or burn under fire conditions. Product can accumulate static charges which can cause an incendiary electrical discharge. The finely divided dust, in sufficient quantity, may form flammable/explosive mixtures with air.**Precautions in connection with Fire** Fire fighters should wear Self-Contained Breathing Apparatus (SCBA) and full protective clothing to prevent exposure to vapours, fumes or products of combustion.

## 6. ACCIDENTAL RELEASE MEASURES

**Emergency Procedures** Avoid accidents, clean up immediately. Wear appropriate personal protective equipment and clothing to prevent inhalation and eye exposure. Sweep up material avoiding dust generation or where possible use dustless methods such as vacuum to collect the material and transfer into suitable labelled containers for subsequent recycling or disposal. If contamination of sewers or waterways occurs inform the local water authorities and EPA in accordance with local regulations. Dispose of waste according to applicable local and national regulations.

## 7. HANDLING AND STORAGE

**Precautions for Safe Handling** Do not create dust during use. Wear gloves and eye protection. Practice good personal hygiene, that is, always wash hands after handling, and before eating, drinking, smoking or using the toilet facilities.**Conditions for Safe Storage** Store in a cool, dry well-ventilated area away from heat, sources of ignition, oxidising agents and foodstuffs, and out of direct sunlight. Keep containers closed when not in use and securely sealed and protected against physical damage. Inspect regularly for deficiencies such as damage or leaks.**Corrosiveness** Not corrosive to metals.

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**National Exposure Standards** No exposure value assigned for this specific material by the National Occupational Health and Safety Commission (NOHSC), Australia. However, the available exposure limits for ingredients are listed below:

Substance	TWA		STEL		NOTICES
	ppm	mg/m <sup>3</sup>	ppm	mg/m <sup>3</sup>	
Sodium hydroxide	-	2	-	-	Peak limitation

TWA (Time Weighted Average): The average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day week.

STEL (Short Term Exposure Limit): The average airborne concentration over a 15 minute period which should not be exceeded at any time during a normal eight-hour workday.

Peak Limitation: A ceiling concentration which should not be exceeded over a measurement period which should be as short as possible but not exceeding 15 minutes.

**Biological Limit Values** No biological limit allocated.**Engineering Controls** Normally not required. Use in a well ventilated area. Do not create dusts.**Respiratory Protection** Where sufficient ventilation is not available, avoid breathing dusts by wearing an AS/NZS 1716 approved particulate/dust filter respirator; however final choice of appropriate breathing protection is dependent upon actual airborne concentrations and the type of breathing protection required will
